Science

Plants

Year Group 1

Vocabulary and Explanation

Petal - thin, various colours or white, forms the flower

Flower - often bright colours, grows at the end of the stem

Stem - thin upright on which the flowers and leaves grow

Leaf - usually green on plants

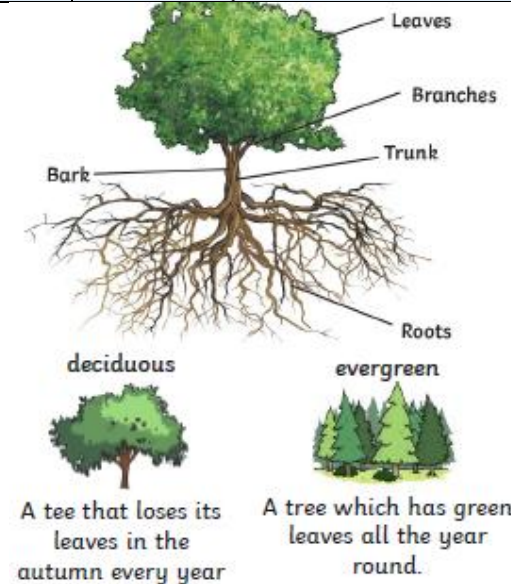

Seed - small, hard part from which a new plant grows

Root - part of the plant which grows underground

Branches - parts that grow out of the trunk of the tree and have leaves

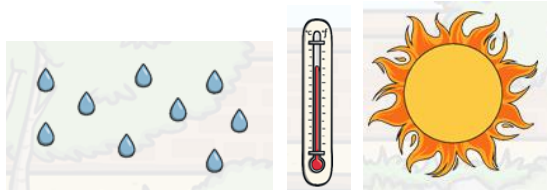

Trunk - brown, large main stem of a tree from which branches grow

Bark - a tough material that covers the outside of the tree.

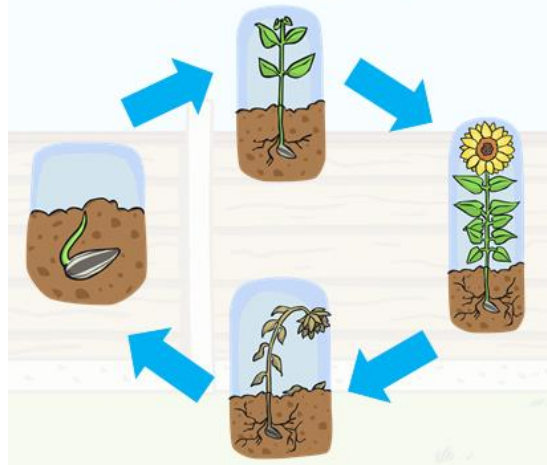

Investigation

What do plants need to grow?

Sunflower Life Cycle

The Rich Brothers, Harry and David, winners of the Chelsea flower show
